

JENNIFER S. HAYES, DO, FACOOG

Visionary Centre for Women; Laser Vaginal Rejuvenation Institute of Tampa Bay & Sarasota

Specialties: State-of-the-art Gynecology, Robotic Gyn Surgery, Advanced Laparoscopy, Cosmetic Gynecology

Vitality — including the sense of one’s sexual vitality — is an important factor in women’s health and quality of life. Board-certified gynecologist, Dr. Jennifer Hayes, has dedicated her life’s work to female-centric health care and perpetuating each patient’s vitality. She is a leader in the community, providing innovative solutions in Gynecology, Robotic and Vaginal Surgery and, most uniquely, Cosmetic Gynecology.

Dr. Hayes was the first gynecologist on Florida’s West Coast to provide robotic surgery. Through tiny incisions, she performs safe operations on the uterus and ovaries, removes fibroids, resects endometriosis and repairs prolapse. She lectures nationally and teaches other surgeons robotic techniques.

With excellent skill and trademarked techniques, Dr. Hayes is the only Doctor in the Bay Area who is an Associate of the Laser Vaginal Rejuvenation Institute of America and is one of the most experienced Cosmetic Gynecology surgeons in the country. She has built a reputation as *the* source for natural-looking Laser Reduction Labiaplasty. Her expertise in Vaginal Rejuvenation before prolapse, and treatment for active, fit women with moderate prolapse, allows her patients to have normal anatomy again and turn back the clock to before childbirth! In addition to the well-known G-Shot[®], Dr. Hayes is on the technological cutting edge in administering the O-Shot[®], which enhances intimate sensation and female performance both inside and out of the body.

It is this expertise and sincerity that keeps Dr. Hayes’ patients satisfied, earning her “Patient’s Choice” Award six years in a row.
